

NIHAD AHMIC

Product Manager

nihadahmic.github.io · linkedin.com/in/nihad-ahmic · nihad.ahmic@outlook.com · +387 62 981 659

Product Manager with 5+ years building and scaling digital products serving millions of users and Fortune 500 clients across onboarding, engagement, rewards, and e-commerce. I work AI-first: using it to compress discovery cycles, surface better decisions, and move faster without losing judgment.

EXPERIENCE

Personify Health · Product Manager

Jun 2022 – Mar 2026 · Providence, US (Remote)

- Owned Rewards & Redemption across Personify's Wellbeing products, enabling millions of users to earn and redeem rewards with US and global partners, driving a core engagement and retention loop.
- Led Enrollment & Onboarding for a health platform serving 5M+ monthly users across 25% of the Global Fortune 500. Analyzed churn using Mixpanel, identified key drop-off points through error message analysis, then redesigned the activation funnel to improve enrollment completion rates.
- Shipped biometric login (face and fingerprint), reducing friction in the authentication flow and improving security for the platform's user base.
- Built a personalized onboarding experience where members select health interests on sign-up, contributing to measurably higher engagement among participants who opted in.
- Explored and prototyped an AI-powered rewards system using Figma and Miro, designed to personalize rewards based on individual member activity patterns.

Juriba Ltd. · Agile Product Owner

Jun 2020 – May 2022 · London, UK (Remote)

- Owned end-to-end product discovery and delivery for a smart grouping product feature that automated device and user segmentation for large-scale IT migration projects.
- Delivered the feature to enterprise clients across the US and Europe, with initial beta launch at a Fortune 500 client, gathering feedback directly and iterating on outcomes.
- Worked directly with clients and implementation specialists to translate complex enterprise needs into roadmap decisions, reporting to the founding product leader.

Rubicon · Quality Assurance Lead

May 2019 – Feb 2020 · Sarajevo, Bosnia & Herzegovina

- Built QA capability combining automated unit testing, manual testing, and strategic test planning alongside lead engineers.
- Collaborated with product owners, developers, and designers to refine UIs, enhance functionality, and proactively identify bugs and performance issues.

SKILLS

Product Roadmapping & strategy, prioritization, A/B testing, cross-functional leadership, data-informed decisions
